World-systems theory (also known as world-systems analysis or the world-systems perspective) is a multidisciplinary, macro-scale approach to world history and social change which emphasizes the world-system (and not nation states) as the primary (but not exclusive) unit of social analysis. "World-system" refers to the inter-regional and transnational division of labor, which divides the world ...

Emissions trading, or cap and trade, is a market-based approach to controlling pollution by providing economic incentives for achieving reductions in the emissions of pollutants. In contrast to command-and-control environmental regulations such as best available technology (BAT) standards and government subsidies, cap and trade (CAT) programs are a type of flexible environmental regulation ...

Financing climate change is an important part of the World Bank Group's business. Our focus has resulted in significant financing flowing to support low-emissions and resilient development. For example, mitigation support for the world's poorest countries through the Bank's IDA reached \$2.3 billion during fiscal year 2013, while the IFC's mitigation financing increased 50 percent to \$2.5 billion.
